SUMMARY

I am a full stack developer completing kood/Jõhvi with 7 years of experience as a material engineer.

IT TRAINING

2022 → 2024

KOOD/JÕHVI

k/

AI

data wrangling ♦ feature engineering ♦

Exploratory Data Analysis ♦ model selection ♦

Natural Language Processing

frontend

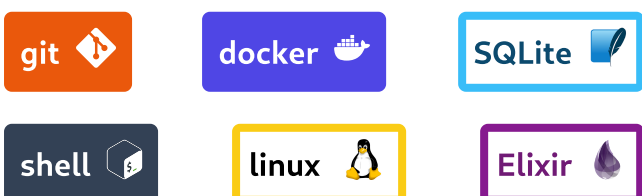

forum ♦ instant chat ♦

file handling ♦ user interface ♦ DOM manipulation ♦ html ♦ css styling ♦ framework ♦ in-browser game

backend

web server ♦ app server ♦ data server ♦ web sockets ♦ REST API ♦ Ajax ♦ hashing ♦ JWT ♦ concurrent programming ♦ algorithms ♦ unit testing

ENGINEERING EXPERIENCE

2011 → 2022

data analysis

process simulation

modeling

parameters optimization

certification

statistical process control

Testing engineer

LM WIND POWER

2020 → 2022

Denmark

Handled test planning, provided technical support and performed simulations

R&T engineer

SAFRAN COMPOSITES

2019 → 2020

France

Took care of testing and qualification of material/bonding in global group R&T center

Material engineer

SAFRAN NACELLES

2017

France

Handled material/painting testing and qualification, provided technical support

Recovery engineer

SAFRAN NACELLES

2016

France

Performed defect analysis and support for damaged nacelle part recovery

R&D engineer

ESPILON COMPOSITE

2011 → 2014

France

Performed testing, formulation and simulation on new composite materials

EDUCATION

2006 → 2011

ENSIL : material science engineering school (master degree) : 3 years

DUT Bordeaux : material science technician school : 2 years

languages

English : fluent | French : native
