SUMMARY

I am a full stack developer student at kood/Jõhvi with 7 years of experience as a material engineer.

IT TRAINING 2022 → 2024

KOOD/JÕHVI 

Golang

web server ♦ app server ♦
data server ♦ web sockets ♦ REST API
♦ Ajax ♦ hashing ♦ JWT ♦ concurrent
programming ♦ algorithms ♦ unit
testing

JavaScript

JS

forum ♦ instant chat ♦
file handling ♦ user interface ♦ DOM
manipulation ♦ html ♦ css styling ♦
framework ♦ browser game

Rust (upcoming) 

Haskell 

git 

docker 

SQLite 

shell 

linux 

GrapQL 

ENGINEERING EXPERIENCE

2011 → 2022

Skills

data analysis

process simulation

modelisation

instrumentation

parameters optimization

certification

process control

Testing engineer

LM WIND POWER

2020 → 2022

Denmark

Handled test planning, provided technical support and performed simulations

R&T engineer

SAFRAN COMPOSITES

2019 → 2020

France

Took care of testing and qualification of material/bonding in global group R&T center

Material engineer

SAFRAN NACELLES

2017

France

Handled material/painting testing and qualification, provided technical support

Recovery engineer

SAFRAN NACELLES

2016

France

Performed defect analysis and support for damaged nacelle part recovery

R&D engineer

ESPILON COMPOSITE

2011 → 2014

France

Performed testing, formulation and simulation on new composite materials

EDUCATION

2006 → 2011

ENSIL : material science engineering school
(master degree) : 3 years

DUT Bordeaux : material science technician
school : 2 years

languages

English : fluent | French : native
